

Interface

Fixed 2/ Set of method
Structure Signature

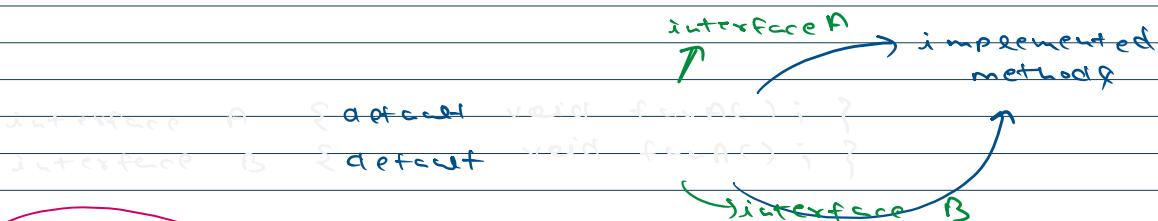

Interface

In java it is a set of method signatures that a class must follow.

Implementing multiple interfaces

```
interface A { void funcA(); }
interface B { void funcB(); }
```

```
class MyClass implements A, B {
    public void funcA() { SOP("funcA"); }
    public void funcB() { SOP("funcB"); }
}
```

interface B < Object

implements A

interface B

class Multiple implements A, B

public void funcA() { super.funcA(); }

public void funcB() { super.funcB(); }

}

→ funcA() ⇒ O/P ⇒ ?

Extending Interface

interface X { void func(); }

interface Y extends X { void func(); }

Comparable / Comparator

class Car {
→ Price
→ color
→ Speed

constructor parameterised
to String

→ 9 objects with values

↓↓

put them in ArrayList
